PROJECT MANAGER

Project Manager and SQA Manager with 3+ years of experience at TechTrio Solutions, leading cross-functional teams and delivering 10+ web and mobile projects across edtech, fintech, healthtech, and SaaS domains. Proven ability to manage project lifecycles, coordinate client requirements, and ensure product quality through end-to-end QA processes.

SKILLS

Project Management: Agile, SDLC, Project Planning, Timeline Management, Client Communication, Requirement Analysis, Team Coordination, Risk Management

Testing Tools & Frameworks: Selenium, Playwright, Appium, Postman, JMeter, LoadRunner, TestNG, BrowserStack, Android Studio, Firebase

Automation Testing (Intermediate): Selenium WebDriver, Playwright, TestNG — experienced in working within existing automation frameworks for web and mobile platforms

API & Performance Testing: Postman, JMeter, LoadRunner — REST API testing, load testing, and performance benchmarking

AI-Based Testing: Hands-on experience applying AI-based testing approaches in live projects

Project & Bug Tracking JIRA, Git

Programming Languages: Python, Java, JavaScript, SQL, HTML, CSS (Academic knowledge: C, C++, C#)

Methodologies & Concepts: Agile, SDLC, STLC, Regression Testing, Smoke Testing, Sanity Testing, Performance Testing, API Testing, Manual Testing, Test Case Design & Execution

Soft Skills: Analytical Thinking, Problem Solving, Client Communication, Team Collaboration, Time Management

WORK EXPERIENCE

Project Manager

TechTrio Solutions, Dhaka

April 2023 - Present

Software Quality Assurance Engineer

TechTrio Solutions, Dhaka

January 2023 – March 2023

Project Management Specialist

TechTrio Solutions, Dhaka

July 2022 – December 2022

Data Entry Specialist

TechTrio Solutions, Dhaka

January 2022 – June 2022

PROJECTS

[mcqXpert](#)

[mcqXpert](#) Served as dual-role Project Manager and SQA Engineer for an advanced online exam preparation platform covering a landing page, web exam portal, and [Android/iOS](#) mobile applications.

- Led end-to-end project planning, feature finalization, and user journey design across the full product ecosystem
- Coordinated cross-functional teams and managed release cycles, maintenance, and continuous product improvements
- Ensured product quality across web and mobile through structured QA oversight

Technologies: JIRA, Confluence, Manual Testing, Postman, Selenium, Android Studio, Firebase, JMeter, BrowserStack

[DEC LMS](#)

DEC Learning Hub A digital healthcare education platform designed for medical professionals, covering structured course delivery, assessments, and learning management.

- Gathered and analyzed client requirements, translating needs into actionable development and QA tasks
- Collaborated directly with clients to identify system issues and coordinated with developers to implement fixes
- Contributed to course structure design and managed ongoing system maintenance and performance improvements

Technologies: Manual Testing, ClickUp, Regression Testing, Performance Testing, Test Case Design & Execution

[FIT CLOUD](#)

FIT Cloud A SaaS-based gym management system for fitness centers across the MENA region, with web and mobile applications for members, trainers, and admins.

- Managed release cycles and coordinated between development and client teams to ensure timely, high-quality deliveries
- Drove continuous process optimization to deliver a seamless user experience across all user roles
- Responsible for overall product quality assurance across web and mobile platforms ([Android](#) & [iOS](#))
- Drove continuous process optimization to deliver a seamless user experience across all user roles

Technologies: ClickUp, Manual Testing, Automation Testing, Postman, Selenium, JMeter, Playwright, Regression Testing, Performance Testing, API Testing

[eCourier App Suite](#)

eCourier App Suite A multi-app courier platform including P2P, Merchant, Agent, and Branch applications for end-to-end shipment and logistics management.

- Coordinated testing activities across all four app platforms to ensure consistent, high-quality user experience
- Managed test planning and execution covering functionality, security, and real-time tracking accuracy
- Ensured system reliability through API and performance testing oversight across all platforms

Technologies: Asana, Manual Testing, App Testing, Postman, JMeter, Regression Testing, Performance Testing, API Testing

eCourier App Link:

- [eCourier P2P App](#)
- [eCourier Merchant App](#)
- [eCourier Agent App](#)
- [eCourier Branch App](#)

[LYFE](#)

LYFE A high-frequency geolocation tracking platform with microservice architecture, delivering real-time user insights and location-based services.

- Coordinated test planning and execution for high-frequency, high-volume geolocation tracking features
- Managed validation of API integrations and microservice architecture to ensure system scalability and reliability
- Ensured platform security and bug-free delivery across web and mobile through structured QA oversight

Technologies: JIRA, Manual Testing, App Testing, Postman, Confluence, JMeter, Regression Testing, Performance Testing, API Testing

- [LYFE App](#)

[Green Spark Solutions](#)

Green Spark Solutions A mobile and web application supporting improved cooking solutions for rural communities through the Green Improved Cookstove initiative.

- Coordinated cross-functional testing activities across web and mobile platforms to ensure reliability and usability
- Managed validation of user interactions, data accuracy, and system integrations across all modules

- Oversaw end-to-end QA workflow ensuring a seamless, bug-free user experience

Technologies: Manual Testing, Postman, Confluence, Selenium, JIRA, Android Studio, Firebase, JMeter

Shukran

Shukran A gratitude-inspired e-commerce platform connecting buyers with products and services rooted in the values of goodness and community support.

- Contributed to project documentation, capturing system features, workflows, and functional requirements
- Participated in feature planning and idea-sharing sessions to support user experience improvements
- Oversaw product quality assurance across web and mobile platforms through exploratory and functional testing ([Android](#))

Technologies: ClickUp, Manual Testing, Documentation, Feature Planning

FITMATE

FitMate A fitness management app for gym users and trainers, featuring membership management, workout tracking, and real-time updates.

- Coordinated test planning and execution across multiple devices to validate app functionality, performance, and security
- Managed QA for core features including membership management, workout tracking, and real-time update flows
- Oversaw system reliability through API and performance testing oversight

Technologies: JIRA, Manual Testing, Postman, JMeter, Regression Testing, Performance Testing, API Testing

SalesTrace

SalesTrace A sales and lead management platform offering lead capture, opportunity tracking, CRM integration, and reporting tools for improving sales team productivity.

- Coordinated validation of core features including lead capture, opportunity tracking, CRM integration, and reporting modules
- Managed QA for sales pipeline workflows ensuring data accuracy across lead conversion processes
- Oversaw system reliability and reporting accuracy through performance and load testing oversight

Technologies: JIRA, Manual Testing, Confluence, App Testing, Regression Testing, Performance Testing

Circlebet

CircleBet An ethical betting platform built around responsible gambling practices, featuring secure transactions, user authentication, and betting history tracking.

- Managed test planning and execution for core features including secure transactions, user authentication, and betting history tracking
- Ensured regulatory compliance and adherence to industry standards for responsible and ethical betting practices
- Oversaw platform stability and reliability through regression and performance testing oversight

Technologies: Asana, Manual Testing, App Testing, Regression Testing, Performance Testing

Hotel Management System

Hotel Management System A comprehensive hospitality management platform covering guest management, room reservations, restaurant services, and real-time operational tracking.

- Coordinated test planning across core modules including Guest Management, Room Reservations, and Restaurant Services
- Managed validation of role-based access controls and real-time tracking features to ensure secure system behavior
- Oversaw end-to-end QA including check-in/check-out process verification and system reliability testing

Technologies: JIRA, Manual Testing, Postman, Selenium, Android Studio, Firebase, JMeter

[Healthy Harvest](#)

Healthy Harvest ERP An integrated ERP system for organic farms and food businesses, covering inventory management, order processing, financial tracking, and CRM to streamline farm-to-table operations.

- Coordinated QA across core modules including inventory management, order processing, financial tracking, and CRM
- Managed validation of product traceability workflows to ensure end-to-end accuracy of organic product records
- Oversaw system reliability and stability through API, performance, and regression testing oversight

Technologies: JIRA, Manual Testing, App Testing, Postman, JMeter, Regression Testing, Performance Testing, API Testing

[World Bank](#)

World Bank — Early Years Preschool Program Impact Evaluation A large-scale impact evaluation project assessing the effectiveness of an early childhood education program, involving baseline and endline survey execution across multiple sites.

- Led successful execution of both Baseline and Endline Surveys, managing full project lifecycle from planning to delivery
- Managed and coordinated a field team of 96 operators, overseeing task distribution and daily operations
- Ensured data quality and accuracy throughout the collection and analysis process
- Maintained project timelines and ensured all deliverables aligned with World Bank goals and objectives

EDUCATION

Computer Science and Engineering
Independent University, Bangladesh

2020 - 2024

CORE COMPETENCE

Project Planning | Agile Methodology | Stakeholder Management | Risk Management | QA Leadership |
Cross-functional Team Coordination | Client Communication | Product Delivery
