SOFTWARE QUALITY ASSURANCE

SQA Manager with 3+ years of progressive experience at TechTrio Solutions, advancing from Data Entry to QA Manager. Specialized in end-to-end quality assurance for web and mobile applications across edtech, fintech, healthtech, and SaaS platforms. Proven track record of leading QA processes for 10+ industry-standard projects using both manual and automation testing tools including Selenium, Playwright, Postman, and JMeter. Skilled in Agile environments with strong project coordination and client communication abilities.

SKILLS

Testing Tools & Frameworks: Selenium, Playwright, Appium, Postman, JMeter, LoadRunner, TestNG, BrowserStack, Android Studio, Firebase

Automation Testing (Intermediate): Selenium WebDriver, Playwright, TestNG — experienced in working within existing automation frameworks for web and mobile platforms

API & Performance Testing: Postman, JMeter, LoadRunner — REST API testing, load testing, and performance benchmarking

AI-Based Testing: Hands-on experience applying AI-based testing approaches in live projects

Project & Bug Tracking JIRA, Git

Programming Languages: Python, Java, JavaScript, SQL, HTML, CSS (Academic knowledge: C, C++, C#)

Methodologies & Concepts: Agile, SDLC, STLC, Regression Testing, Smoke Testing, Sanity Testing, Performance Testing, API Testing, Manual Testing, Test Case Design & Execution

Soft Skills: Analytical Thinking, Problem Solving, Client Communication, Team Collaboration, Time Management

WORK EXPERIENCE

Software QA Manager

TechTrio Solutions, Dhaka

April 2023 - Present

Software Quality Assurance Engineer

TechTrio Solutions, Dhaka

January 2023 – March 2023

Project Management Specialist

TechTrio Solutions, Dhaka

July 2022 – December 2022

Data Entry Specialist

TechTrio Solutions, Dhaka

January 2022 – June 2022

PROJECTS

[mcqXpert](#)

[mcqXpert](#) Served as dual-role Project Manager and SQA Engineer for an advanced online exam preparation platform covering a landing page, web exam portal, and [Android/iOS](#) mobile applications.

- Planned and finalized all system features, workflows, and user journeys across the full product ecosystem
- Led end-to-end QA for all components — web, portal, and mobile — ensuring functionality, usability, and performance
- Coordinated cross-functional teams and managed ongoing maintenance and continuous product improvements
- Conducted mobile app testing on both Android and iOS platforms

Technologies: Manual Testing, Postman, Selenium, JIRA, Android Studio, Firebase, JMeter, BrowserStack

[DEC LMS](#)

DEC Learning Hub A digital healthcare education platform designed for medical professionals, covering structured course delivery, assessments, and learning management.

- Conducted requirement analysis and translated client needs into actionable QA and development tasks
- Designed and executed test cases covering functional, regression, and performance testing
- Collaborated directly with clients to identify system issues and with developers to implement fixes
- Contributed to course structure design and ongoing system maintenance and performance improvements

Technologies: Manual Testing, JIRA, Regression Testing, Performance Testing, Test Case Design & Execution

[FIT CLOUD](#)

FIT Cloud A SaaS-based gym management system for fitness centers across the MENA region, with web and mobile applications for members, trainers, and admins.

- Led end-to-end QA including manual testing, automation (Selenium, Playwright), API testing (Postman), and performance testing (JMeter)
- Managed release cycles and coordinated between development and client teams to ensure timely, high-quality deliveries
- Responsible for overall product quality assurance across web and mobile platforms ([Android](#) & [iOS](#))
- Drove continuous process optimization to deliver a seamless user experience across all user roles

Technologies: Manual Testing, Automation Testing, Postman, Selenium, JIRA, Android Studio, Firebase, JMeter, Playwright, Regression Testing, Performance Testing, API Testing

[eCourier App Suite](#)

eCourier App Suite A multi-app courier platform including P2P, Merchant, Agent, and Branch applications for end-to-end shipment and logistics management.

- Designed and executed comprehensive test plans covering functionality, security, and real-time tracking accuracy
- Performed manual and automated testing to validate QR-based processing and secure authentication flows
- Conducted API testing (Postman) and performance testing (JMeter) to ensure system reliability under load
- Ensured consistent, high-quality user experience across all four app platforms

Technologies: Manual Testing, App Testing, Postman, JMeter, Regression Testing, Performance Testing, API Testing

eCourier App Link:

- [eCourier Merchant App](#)
- [eCourier Agent App](#)
- [eCourier Branch App](#)

[LYFE](#)

LYFE A high-frequency geolocation tracking platform with microservice architecture, delivering real-time user insights and location-based services.

- Conducted thorough testing on high-frequency, high-volume geolocation tracking features to ensure accuracy and reliability
- Developed and executed test plans to validate API integrations and microservice architecture
- Performed API testing (Postman) and performance/load testing (JMeter) to verify system scalability under heavy traffic
- Ensured platform security and delivered a bug-free experience across web and mobile

Technologies: Manual Testing, App Testing, Postman, JMeter, Regression Testing, Performance Testing, API Testing

- [LYFE App](#)

[Green Spark Solutions](#)

Green Spark Solutions A mobile and web application supporting improved cooking solutions for rural communities through the Green Improved Cookstove initiative.

- Tested key functionalities across web and mobile platforms to ensure reliability, usability, and performance
- Validated user interactions, data accuracy, and system integrations across all modules
- Performed API testing (Postman) and automated testing (Selenium) to verify end-to-end workflows
- Ensured a seamless, bug-free user experience across all modules through structured manual testing

Technologies: Manual Testing, Postman, Selenium, JIRA, Android Studio, Firebase, JMeter

Shukran

Shukran A gratitude-inspired e-commerce platform connecting buyers with products and services rooted in the values of goodness and community support.

- Contributed to project documentation, capturing system features, workflows, and functional requirements
- Participated in idea-sharing sessions to support feature planning and user experience improvements
- Performed exploratory and functional testing on key e-commerce features to identify bugs and usability issues
- Responsible for overall product quality assurance across web and mobile platforms ([Android](#))

Technologies: Manual Testing, Documentation, Feature Planning

FITMATE

FitMate A fitness management app for gym users and trainers, featuring membership management, workout tracking, and real-time updates.

- Conducted rigorous multi-device testing to validate app functionality, performance, and security
- Developed and executed test cases for core features including membership management, workout tracking, and real-time update flows
- Performed API testing (Postman) and performance/load testing (JMeter) to ensure system reliability
- Delivered a seamless, bug-free experience across all modules meeting high-quality standards for both gym users and trainers

Technologies: Manual Testing, App Testing, Postman, JMeter, Regression Testing, Performance Testing, API Testing

SalesTrace

SalesTrace A sales and lead management platform offering lead capture, opportunity tracking, CRM integration, and reporting tools for improving sales team productivity.

- Validated core features including lead capture, opportunity tracking, CRM integration, and reporting modules
- Performed API testing (Postman) to verify data accuracy across lead conversion and sales pipeline workflows
- Conducted performance and load testing (JMeter) to ensure system reliability under real-world usage
- Tested reporting and analytics features to confirm accuracy of sales insights and data-driven decision-making tools

Technologies: Manual Testing, Postman, JMeter, Regression Testing, Performance Testing, API Testing

Circlebet

CircleBet An ethical betting platform built around responsible gambling practices, featuring secure transactions, user authentication, and betting history tracking.

- Developed and executed test plans for core features including secure transactions, user authentication, and betting history tracking
- Ensured regulatory compliance and adherence to industry standards for responsible and ethical betting practices
- Conducted regression and performance testing to verify platform stability and reliability under load
- Delivered a seamless, error-free user experience across all app modules through rigorous manual and app testing

Technologies: Manual Testing, App Testing, Regression Testing, Performance Testing

Hotel Management System

Hotel Management System A comprehensive hospitality management platform covering guest management, room reservations, restaurant services, and real-time operational tracking.

- Tested core modules including Guest Management, Room Reservations, and Restaurant Services for functionality, security, and performance
- Validated role-based access controls and real-time tracking features to ensure secure and accurate system behavior
- Verified the end-to-end check-in/check-out process through structured manual and automated (Selenium) testing
- Conducted API testing (Postman) and performance testing (JMeter) to optimize system reliability

Technologies: Manual Testing, Postman, Selenium, JIRA, Android Studio, Firebase, JMeter

Healthy Harvest

Healthy Harvest ERP An integrated ERP system for organic farms and food businesses, covering inventory management, order processing, financial tracking, and CRM to streamline farm-to-table operations.

- Tested core modules including inventory management, order processing, financial tracking, and CRM for functionality and data accuracy
- Validated product traceability workflows to ensure end-to-end accuracy of organic product records
- Performed API testing (Postman) and performance/load testing (JMeter) to verify system reliability under operational load
- Conducted regression testing to ensure stability across all modules following updates and new feature releases

Technologies: Manual Testing, App Testing, Postman, JMeter, Regression Testing, Performance Testing, API Testing

World Bank

World Bank — Early Years Preschool Program Impact Evaluation A large-scale impact evaluation project assessing the effectiveness of an early childhood education program, involving baseline and endline survey execution across multiple sites.

- Led successful execution of both Baseline and Endline Surveys as Project Manager
- Managed and coordinated a field team of 96 operators, overseeing task distribution and daily operations
- Ensured data quality and accuracy throughout the collection and analysis process
- Maintained project timelines and ensured all deliverables aligned with World Bank goals and objectives
